Agentic automation built for your workflows

PRODUCTION-READY AI AGENTS FOR COMPLEX OPERATIONS, GOVERNED BY DESIGN, CONTINUOUSLY MONITORED, WITH HUMANS IN THE LOOP WHERE IT MATTERS

THE PROBLEM: Automation breaks where the real work begins

Task-based automation has become impossible to scale across real-world operations. Script-based and task-level automation can't survive real-world operations:

- Variability overwhelms rigid workflows
- Core systems change faster than integrations
- Opaque decisions block Legal, Audit, and enterprise rollout
- High cost, fragile delivery, no reuse, no compounding returns

Do your most valuable workflows still rely on humans to hold systems together, interpret messy inputs, catch AI mistakes, and prove decisions? Those workflows are ready for agentic automation.

THE SOLUTION: Agentic automation - built to run your exact workflows

Unframe delivers tailored agentic solutions designed around how your business actually operates and the exact outcomes for success.

Each agent:

- **Owns** an end-to-end workflow
- **Reasons** using your business context
- **Operates** safely in production
- **Governed,** monitored, and auditable by design

WHAT MAKES UNFRAME DIFFERENT

AUTONOMY

Goal-driven agents that own outcomes

Agents run complex, multi-step workflows end-to-end across systems, delivering 80%+ autonomy even in exception-heavy operations.

CONTEXT

**Agents that reason in your business terms**

Agents reason in your business context, making role-aware decisions that persist across long-running workflows.

TRUST

Automation you can monitor, control, and defend

Every action is deterministic, logged, and confidence-scored, with human review triggered automatically when risk rises.

HOW UNFRAME DELIVERS AGENTIC AUTOMATION

Connect	Teach	Automate	Certify
Link Systems & Data	Embed Rules & Policies	Execute Tasks with AI	Log & Audit Everything

AGENTS AT RUNTIME

Reason	Act	State	Govern	Humans step in
Analyze requests	Execute in your systems	Updated records	Log and audit	when needed

Humans intervene only where risk demands. From request to resolution, automatically, and under control.

EXPERIENCE-BACKED EXECUTION

Unframe's approach is shaped by hundreds of agentic deployments across critical, real-world workflows. That experience informs:

→ What to automate

→ What not to automate

→ Where humans must stay involved

→ How to prove the system is behaving

Common workflows:

- ✓ AML Alert Triage and Case Resolution
- ✓ Transaction Monitoring False-Positive Deflection
- ✓ Customer Support Email-to-Task Triage & Escalation
- ✓ Audit Response and Evidence Assembly
- ✓ On-Prem Carrier & Third-Party Portal Automation
- ✓ AI-Powered Campaign & Promotional Planning
- ✓ Portfolio, Asset, and Lease Performance Reporting
- ✓ Contract and Document Intelligence Extraction

WHAT THIS UNLOCKS FOR YOUR BUSINESS

Automation you can put in production

→ Deterministic, auditable actions, Legal and Audit approve

→ Predictable throughput instead of constant firefighting

→ Critical operations run without babysitting

Handles complexity scripts can't

→ Works across portals, documents, email, tools, and legacy systems

→ Adapts to change without re-engineering

→ Exceptions become signals, not failures

Built to scale, not reset

→ Every deployment compounds: knowledge, logic, and connectors are reused

→ New automations are faster than the first ones

→ Time-to-value accelerates while marginal cost declines

About Unframe

Unframe

Unframe is the Managed AI Delivery Platform that delivers AI solutions that work — tailored to your business and delivered in days. With Unframe, organizations can turn high-value AI use cases into real outcomes, without sharing data, committing upfront costs, or compromising on results. Unframe is headquartered in Cupertino, California, with a global presence in Tel Aviv and Berlin.
