

# Tailored AI Enterprise Search

**KNOWLEDGE ON-DEMAND: GOVERNED, CONTEXT-AWARE SEARCH BUILT FOR ENTERPRISES**

## **THE PROBLEM: Generic enterprise search isn't good enough**

Generic enterprise search tools promise quick fixes. But in complex, regulated environments, that simplicity becomes a limitation. Relying on keyword-based, low-precision retrieval and disconnected from business logic, these tools create ongoing issues that slow teams down instead of accelerating operations.

The frustrations mount: results often come back out of context, sensitive data can leak through broad permissions, and everyone gets the same answer even when they shouldn't. AI responses are hard to verify and seat-based pricing makes it difficult to scale across the organization.

## **THE SOLUTION: Tailored, context-aware search experience built for scale**

Built for complex environments, Unframe's tailored enterprise search brings every system, dataset, and policy together to provide instant access to trusted, context-aware answers.

- ✔ **Unified Search & Knowledge Access**  
Instantly search across SharePoint, Slack, Salesforce, internal drives, and more. Bring all your organizational knowledge into one place so employees can find answers without friction.
- ✔ **Trusted, Explainable Answers**  
Receive responses enriched with your domain language, policies, and context, with every answer linked directly back to its original source for full transparency and reliability.
- ✔ **Intelligence Tailored to Your Team**  
Get results aligned to each team's workflows and permissions, and generate dashboards or reports automatically from simple natural-language questions to accelerate decision-making.

With Unframe, you'll have a production-ready solution tailored to your needs. **In days**, not months.

## BUILT FOR THE COMPLEXITY THAT GENERIC SEARCH CAN'T HANDLE

- **Understands your business, not just your documents** – Our semantic fabric learns your terminology, entities, and workflows so answers are precise to how teams work.
- **Makes governance a feature, not an obstacle** – Every result respects roles, permissions, and lineage. Every answer is traceable to the original source. Every interaction is compliant by design.
- **Fits your ecosystem - instead of forcing you into one** – It delivers intelligence inside the tools your teams already use and plugs into any SaaS, API, file, and even any LLM – deploy on cloud or on-prem, with zero disruption or lock-in.
- **Scales across your entire enterprise** – One intelligence layer powers every team, across regions and data volumes. Tailored to each business unit, shared context, zero duplication.

## PROVEN IN THE WORLD'S MOST COMPLEX ORGANIZATIONS

### Fortune 500 Investment Bank

**PROBLEM:**

Generic search tools couldn't make sense of fragmented CRM, CMS, email, and transaction data – leaving teams with inconsistent, unreliable insights.

**SOLUTION:**

Unframe delivered an AI-driven search engine that unifies structured & unstructured data. It also adds contextual tagging and full traceability.

**RESULTS:**

**\$100M+ productivity gains | 98%+ accuracy**

### Global Marketing Intelligence Firm

**PROBLEM:**

Analysts had to manually stitch insights across BigQuery, Improvado, Zoho, Teamwork, Airtable, and Drive – generic tools couldn't give contextual answers.

**SOLUTION:**

Unframe delivered a tailored semantic search and natural-language query layer with contextual understanding built from their workflows.

**RESULTS:**

**80% less manual analysis | Live in < 1 month**

## About Unframe

Unframe is the Managed AI Delivery Platform that delivers AI solutions that work – tailored to your business and delivered in days. With Unframe, organizations can turn high-value AI use cases into real outcomes, without sharing data, committing upfront costs, or compromising on results. Unframe is headquartered in Cupertino, California, with a global presence in Tel Aviv and Berlin.
