AI-powered Inventory Intelligence

CONTROL INVENTORY DECISIONS WITH FINANCIAL PRECISION

### Inventory is your largest balance-sheet lever, yet it's managed reactively

Retail planning leaders must make millions of SKU × store inventory decisions every week, yet most ERP/planning tools still don't tell them what to reorder, transfer, or hold.

Today's reality:
- Forecasts miss inbound supply timing
- Reorders trigger new buys before excess is rebalanced
- Working capital exposure appears only after the fact

The Solution: AI-powered inventory intelligence with financial precision

Unframe's AI-powered inventory intelligence solution unifies POS, ERP, OMS, WMS, and inventory feeds into a single decision environment and generates daily SKU × size × store forecasts that incorporate seasonality, promotions, and inbound POs. But insight alone doesn't fix inventory. Unframe surfaces a prioritized Daily Brief that tells planning leaders exactly what to do - reorder, transfer, or hold - and quantifies the working capital and margin impact before execution. Transfer-first logic rebalances excess across the network before triggering new buys.

ERP · POS · BI · WMS · OMS → Inventory Intelligence → Daily Brief → Reorder / Transfer / Hold

INVENTORY INTELLIGENCE IN ACTION

35%
Reduction in tail inventory

2%
Revenue uplift from improved inventory accuracy

30%
Reduction in planner triage time

WHAT IT TAKES TO OPERATE INVENTORY AT SCALE

INVENTORY CONTROL

Prioritize the SKU × store decisions that materially impact revenue and margin.

CAPITAL EFFICIENCY

Understand the working-capital and margin impact before executing reorders or transfers.

OPERATIONAL CLARITY

Align Planning, Finance, and Supply Chain with one operational view of inventory.

WHY RETAILERS DEPLOY UNFRAME

→ **Tailored to your planning workflows, deployed in days:** Unframe adapts to your existing OTB cadence and ERP execution processes and connects directly to POS, ERP, OMS, and WMS systems.

→ **Grounded in your business context:** Unframe's Knowledge Fabric captures how your business actually operates, including SKU hierarchies, transfer rules, lead times, and margin logic.

→ **Governed and finance-ready:** Approval workflows, audit trails, and financial rollups ensure every decision is transparent and defensible.

→ **Transfer-first remediation:** Rebalance excess inventory across stores and DCs before triggering new buys.

→ **Financial impact before execution:** Every recommendation shows the working-capital and margin implications.

A NEW WAY TO GET AI-NATIVE ENTERPRISE SOLUTIONS

Unframe brings tailored AI into your operations - built around your workflows and deployed within days.

✓ **Faster time-to-value**

✓ **Production-ready, in days**

✓ **Zero upfront risk**

✓ **Enterprise-grade**
