

SOLUTION BRIEF

Key AI Use Cases for Manufacturing Operations

- ✓ **Demand Forecasting:** Aggregate historical sales and market trends to accurately forecast product demand and optimize inventory management.
- ✓ **IT Operations Management:** Proactively detect, triage, and resolve IT system anomalies across the manufacturing network, reducing system downtime and improving operational continuity.
- ✓ **Warranty Claims Analysis:** Aggregate and analyze warranty claim data across products, regions, and vendors to detect common failure patterns, identify high-risk suppliers, and recommend design or process improvements.
- ✓ **Contract Intelligence:** Automatically extract and structure key clauses (pricing, warranty terms, liability, service agreements) from supplier contracts, regulatory filings, and policy documents across jurisdictions.
- ✓ **Supply Chain Optimization:** Monitor supplier performance, predict disruptions, and dynamically adjust procurement and production plans to ensure resilient operations.
- ✓ **Enterprise Search:** Quickly search, tag, and extract critical information to deliver fast, actionable insights through a centralized dashboard, enabling teams to find best practices, procedural standards, and regulatory requirements instantly.

Why Unframe

- **Rapid Deployment:** Say a use case > get the solution. No need to wait or pay-to-play.
- **Security & Compliance:** Unframe securely integrates with any SaaS, API, database, or file ensuring no data ever leaves your perimeter unless you choose.
- **Enterprise-Grade AI:** Powerful, LLM-agnostic solutions tailored for large-scale retail operations.
- **Outcome-Based Pricing:** Experience AI solutions risk-free before committing, with no restrictions on users, queries, or integrations.
