

Solve all your AI use cases with one platform

YOUR AI USE CASES ARE UNIQUE

AI is the most important tech game-changer in decades. Adopting AI into business operations is a must. Yet, the solutions currently available in the market often fall short, failing to address the unique needs and use cases of the global enterprise.

Building a system in-house is both expensive and time-consuming, while scaling point solutions is impossible. If organizations choose to do nothing, they risk falling behind their more agile competitors. Because of this, many find themselves at a crossroads.

Moreover, sharing sensitive data outside your secure environment or with a public Large Language Model (LLM) is risky and can therefore slow down or completely block AI adoption.

THE BLUEPRINT APPROACH

On our platform, every solution is made from a blueprint. Adding the blueprint to your AI interactions provides invaluable context to supercharge the AI model.

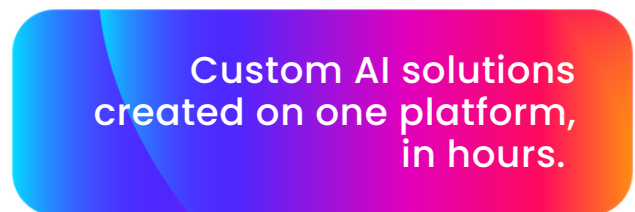

MEET UNFRAME

Introducing the Turnkey Enterprise AI Platform

With Unframe's enterprise-grade AI capabilities built for scale, businesses can maintain control over their processes and integrate AI seamlessly with any existing data sources – without the need for extensive model training or fine-tuning.

-
- **Unprecedented** AI capabilities.

 - **You're in control.** Evaluate solutions fast and iterate freely.

 - **Runs on any data, anywhere.** No model training or fine-tuning.

 - **Say a use case.** Get the solution. No need to wait or pay-to-play.

COMMON CAPABILITIES

EXPLORE WHAT THE WORLD'S LEADING BUSINESSES BUILT WITH OUR PLATFORM.

→ OBSERVABILITY

Natural Language to analyze, search and edit data. Regain access to legacy systems' data.

IT Ops Solution

Fortune 100 Insurance

servicenow dynatrace
 Jira Confluence

Enterprise Search, Analysis

Fortune 500 Bank

→ ABSTRACTION

Unstructured data → Usable structured data
 Manual processing → AI

Lease Abstraction

Fortune 500 Real Estate Co

Program Listings

Media Measurement Co

→ AGENTS

Workflows and autonomous actions
 Proactive insights

Autonomous Sales Agent

Global Tech Distributor

JIT Sales Enablement

Cybersecurity Decacorn

→ MODERNIZATION

Legacy system → AI native software

Reinventing Banking

Leading International Bank

Reinventing Manufacturing

Industrial Conglomerate

INTEGRATE WITH ANYTHING, FAST.

Any SaaS

Any API

Any DB

Any File

Any Environment

No data shared outside your perimeter

About Unframe

Unframe is transforming businesses to be AI native with its revolutionary Blueprint Approach. By creating custom solutions for any AI use-case on top of the Turnkey Enterprise AI Platform, Unframe enables organizations to achieve new levels of efficiency and productivity. Unframe is headquartered in Cupertino, California, with a global presence in Tel Aviv and Berlin.
